

01 / SPONSOR PACKAGE

YOUR BRAND ON THE BUILD.

SHFT Robotics is North York's new FRC team, building our first competition robot for the 2027 season. Sponsors pay for the robot, the tools, the travel, and the shop where students build it.

\$250 to \$10,000+

SPONSORSHIPS START AT \$250. EVERY
LEVEL KEEPS A STUDENT BUILDING.

[BECOME A SPONSOR](#)

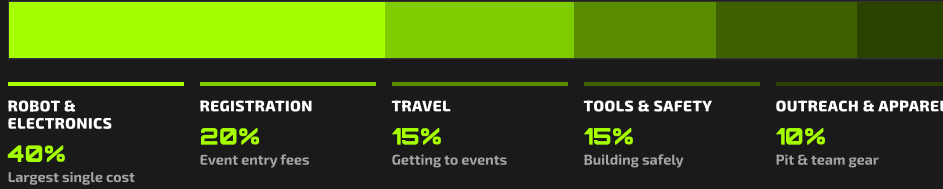

02 / FUNDING MAP

WHERE YOUR MONEY GOES.

Every place your support lands in a season, by share of the budget. No mystery, no overhead games.

WHERE SUPPORT GOES

By share

Robot and electronics includes a practice robot, spare parts, and competition field elements to build on.

CASH SUPPORT

Directly funds purchases, registration, shipping, and event costs.

IN-KIND SUPPORT

Materials, machining, printing, tools, food, transport, space, and services count toward tier value.

MENTOR SUPPORT

Engineers, designers, machinists, operators, and project managers can mentor students.

EVENT SUPPORT

Host a demo, sponsor an open house, or bring SHFT to a company STEM day.

How funds are handled: Contributions support a youth robotics program. We confirm the payee and any available tax treatment with you directly when you come on board, and every sponsor receives an acknowledgment and an invoice for their records.

03 / PARTNERSHIP LEVELS

CHOOSE A TIER.

Each level buys more logo placement and access. Benefits are cumulative. In-kind contributions are welcomed and credited at fair market value when they offset real season costs.

MOST VISIBLE - FOUNDING

FOUNDING PARTNER

\$10,000+

Premier logo, first position on the robot (debuts 2027, per FIRST robot rules). Pit banner, apparel, website, sponsor wall, season recap, a social launch post, and open house materials. Includes a robot demo once it is built.

PLATINUM

\$5,000+

Large logo on the robot. Pit banner, apparel, website, sponsor wall, and a sponsor social feature. Workshop tour when the schedule allows.

GOLD

\$2,500+

Medium logo. Pit banner, apparel, website, and sponsor wall, plus a social thank-you and a season recap update.

SILVER

\$1,000+

Small logo. Pit banner or apparel, website listing, sponsor wall, and a social thank-you.

COMMUNITY

\$250+

Name listing on the website and sponsor wall, plus a social thank-you. For families, alumni, and local supporters.

Benefits are cumulative and reflect our planned first season. Robot placement is reserved for Founding Partner and Platinum, per FIRST robot rules.

WHERE YOUR LOGO LIVES.

Sponsor logos ride into competition on the robot, in the arena, and in every match photo from the season.

EXAMPLE - FRC 1323

Your logo rides into every match.

On the robot, in the arena, on every camera.

Robot placement is reserved for Founding Partner and Platinum, per FIRST rules. Team and robot photos throughout are from the FIRST Robotics Competition community (event photos courtesy NASA / Stennis Space Center, public domain), shown as real examples. SHFT's first competition robot debuts in 2027.

ON THE ROBOT

A sponsor panel carries your logo into every match, in the arena and on camera.

IN THE PIT

The pit banner faces every team, family, and judge who walks the event floor.

ON APPAREL

Sponsor logos ride on team shirts at events, demos, and outreach.

ONLINE

Your name and logo on the website sponsor wall and in season social posts.

05 / WHY BACK A ROOKIE

A TEAM WORTH BACKING IN YEAR ONE.

This is our first season, so there are no results to point to yet. Here is what is real right now: students doing the engineering, with mentors who have built FRC robots before.

WHO RUNS IT

Malhar Soni, Team Director and Head Coach, with mentors who have hands-on FRC build and competition experience.

WHERE WE ARE

Based in North York, Ontario. We compete at Ontario FRC events in the 2027 season.

WHAT STUDENTS DO

Six subteams: CAD, programming, fabrication, strategy, media, and business. Students design, machine, and program the robot themselves.

STUDENTS GET THE WORK

CAD, programming, fabrication, strategy, media, and business operations. Mentors guide; students build.

SPONSORS GET THE STORY

Your logo travels on the robot, the pit banner, apparel, the website, and social. Locally, it ties your company to students in your own community.

COMMUNITY SEES IT

Competitions, demos, open houses, and school events turn your support into something families and students can see.

YOU GET IN FIRST

Sign on now and your logo is on the first robot reveal, the first apparel run, and the launch video.

A FIRST TEAM MEETS DR. WOODIE FLOWERS, WHO NAMED GRACIOUS PROFESSIONALISM.

GRACIOUS PROFESSIONALISM.

It is the ethos of FIRST, and the way SHFT works: serious engineering, done with respect for the people around you.

We are building a team **any student can join, no experience needed**. Newcomers learn beside mentors who have built robots before. On event day we compete hard, then walk to the next pit and help a rival get running again.

Back SHFT and your name stands with a team learning to compete the right way: **hard on the field, decent off it**. That is the standard we are building toward.

Gracious Professionalism® was coined by Dr. Woodie Flowers (1943–2019), distinguished advisor to FIRST.

07 / JOIN THE BUILD

READY TO SPONSOR SHFT?

Start with a short conversation. We confirm the right tier, collect your logo, and get every detail right before anything goes public.

FOUNDING PLACEMENT ON THE FIRST ROBOT, PIT, AND APPAREL CLOSES WHEN OUR SEASON STARTS:

September 10, 2026

ON APPAREL

Founding partners appear on team apparel, worn at every event, demo, and outreach day.

CONTACT

Sponsorship contact: Malhar Soni, Head Coach, Team SHFT
Email: team@shftrobotics.com
Website: shftrobotics.com
Instagram: [@shftrobotics](https://www.instagram.com/shftrobotics)
Location: North York, Ontario

To start: pick a tier, send a vector logo, and confirm your display name. We send an invoice once you choose.
