

— FOUNDDING COHORT · ENROLLING NOW

JOIN SHFT ROBOTICS.

A competitive FRC robotics team in North York for grades 8 to 12. No experience required. Students design, build, and program a full-size competition robot and compete across Ontario.

— WHY SHFT

- 01 Team Director and Head Coach Malhar Soni; Voluntary Mentor Noeen Kashif. They mentor FRC Team 7558 ALT-F4: 35th in Canada in 2019, 3rd in 2026.
- 02 Sister-team partnership with Team 7558 ALT-F4: shared designs, joint practice, coordinated scouting.
- 03 Sponsored by WCP (West Coast Products), whose parts run on competition robots worldwide.
- 04 A dedicated workshop at 26 Mallard Rd with a full regulation FRC practice field.
- 05 A four-month CAD course before build season, then real fabrication, wiring, and programming.
- 06 Every student builds a portfolio: CAD models, code they wrote, and a robot they helped put on the field.
- 07 Our goal in year one: a top-10 finish in Ontario. We say it out loud because our mentors have made this climb before.

BUILT FROM THE GROUND UP

Every student is trained into a role and coached until they own it, through a season of structured workshops. We don't take it easy.

PART OF THE COMMUNITY

Team SHFT is excited to learn from the FRC community and share resources along the way.

PROGRAM FEE

THE PROGRAM FEE IS \$8,000 FOR THE YEAR.

It covers registration, parts, tools, the facility, food, and coaching. We meet with every family one-on-one before anyone commits.

TRAINING BEGINS SEPTEMBER 2026 · FIRST COMPETITION SEASON JANUARY TO APRIL 2027 ·
ENROLLMENT CLOSSES DECEMBER 2026 · 20 TO 25 SPOTS
